

DECORA TRAPPING NEVER LOOKED BETTER

- ✓ No Pesticides/Odor-Free
- ✓ Durable All-Weather Construction
- ✓ Light-weight and easy to set up
- ✓ Indoor/Outdoor

The DynaTrap® operates economically and is easy to set-up. It traps insects without chemicals being added to the environment or the surrounding area.

Our award winning DynaTrap® technology uses a 3-way protection plan for insect extermination. A powerful UV emitting fluorescent bulb produces warm and bright light that attracts insects to the unit. The DynaTrap® also produces carbon dioxide, which is irresistible to mosquitoes. After Insects and mosquitoes are lured to the trap, the powerful fan draws them into the retaining cage where they dehydrate and die.

FEATURES

- Indoor/Outdoor
- No expensive attractant or propane necessary
- Smokeless – pesticide and odor free
- Operate 24 hours a day, 7 days a week
- Provides up to 1 acre coverage
- Easy to set up & whisper-quiet
- Durable all weather construction

- 1 year warranty
- Includes: UV bulb - approx. 3,000 hours (4 months), cleaning brush, 10 ft. cord (110 VAC)
- DT150-TUN - INDOOR
- UV bulb - approx. 20,000 hours (2.25 years), and 6 ft. cord (120 V-240V)

See reverse side for more information.

*Mosquito Relief
is on the way!*

Our Customers Say It Best...

"There is definately a decrease of flying insects in my backyard. My neighbor is enjoying the full protection of his yard too." Michael K., Virginia Beach, VA

Attract, trap and kill flying insects including mosquitos, biting flies, Asian beetles, wasps, hornets, yellow jackets, moths, stink bugs, no-see-ums and more!

THE SCIENCE OF DYNATRAP

UV

Special UV producing light bulbs ignite a Photocatalytic Reaction between Ambient Organic Matter circulated by the internal fan over the TiO₂ Surface releasing the irresistible Insect lure of CO₂ and H₂O.

CO₂

CARBON DIOXIDE
Insects are lured into the trap by the trail of CO₂ where they are vacuumed up and trapped by the internal fan to dehydrate and die.

PHOTOCATALYTIC REACTION

TiO₂ TREATED SURFACE

ULTRAVIOLET RAYS

The Dynatrap's special UV bulb generates warmth and UV rays, attracting flying insects night and day.

TITANIUM DIOXIDE COATING

The exclusive TiO₂ (Titanium Dioxide) coated surface produces CO₂ (Carbon Dioxide), irresistible to mosquitoes. This occurs through a photocatalytic reaction, when UV rays hit the TiO₂ and organic matter (pulled in by the airflow from the fan) turns into CO₂ and H₂O (water vapor).

POWERFUL VACUUM ACTION FAN

Dynatrap's powerful, yet whisper-quiet fan draws insects into the retaining cage, where they are trapped by the vacuum action, and eventually dehydrate and die (usually within 24 hours). The retaining cage is removable, allowing the contents to be emptied into the trash.

ITEMS AND ACCESSORIES

ITEM	DESCRIPTION	UPC#	INDIVIDUAL PACK		MASTER CARTON	
			Dimensions	Weight	Dimensions	Qty. Weight
DT1050-TUN	DYNATRAP® Insect Trap - Decora Series - ½ Acre	0 43256 33110 8	11.25" × 11.25" × 14.5"	4.73 lbs.	34" × 14.75" × 28"	6 31 lbs.
