

MICROTEC is an extra compact industrial vacuum with multi-stage filtration. A well-known solution in the electronics industry, but its size and efficiency also make it a popular system for general cleaning.

Features

- ✓ Compact and lightweight for maximum portability
- ✓ Powerful bypass motor with independent cooling
- ✓ Up to 3 stages of high-efficiency filtration
- ✓ Safety cap for disposable bags
- ✓ Powder coated steel construction
- ✓ Very low noise level
- ✓ Options available for cleanroom conformity

Filtration

Primary Filter	Star
Surface Area	2 ft ² (0.2 m ²)
Media Class (IEC 60335-2-69)	PTFE Coated - Class M
Upstream HEPA (Included)	Certified Class H14 (99.995% @ 0.18 µm)
Downstream HEPA (Included)	Certified Class H14 (99.995% @ 0.18 µm)

Optionals

- Cleanroom Configuration Kit
- Partial or Full Stainless Steel Frame
- Disposable Filter Bags (5-Pack)
- Additional HEPA or ULPA Filters
- More Power Sources Available By Request

MICROTEC

Voltage	V - Hz	115 - 60 1~
Power	HP (kW)	1.3 (1)
