

TRAP'EM YOUR WAY

- ✓ Hang, Stand, or Wall-Mount
- ✓ Durable All-Weather Construction
- ✓ No Pesticides/Odor-Free
- ✓ Indoor/Outdoor

The versatile DynaTrap® DT1100 offers multiple installation options. Hang it with the included chain, stand it using the padded feet, or quickly mount it to a wall or post for a stylish lantern-like appearance.

Our award winning DynaTrap® technology uses a 3-way protection plan for insect extermination. A powerful UV emitting fluorescent bulb produces warm and bright light that attracts insects to the unit. The DynaTrap® also produces carbon dioxide, which is irresistible to mosquitos. After Insects and mosquitos are lured to the trap, the powerful fan draws them into the retaining cage where they dehydrate and die.

FEATURES

- Indoor/outdoor
 - No expensive attractant or propane necessary
 - Smokeless – pesticide and odor free
 - Operate 24 hours a day, 7 days a week
 - Provides up to ½ acre coverage
 - Optional Wall Mount
 - Patented Automatic Damper Prevents Insects From Escaping
 - Durable all weather construction
 - Easy to set up & whisper-quiet
 - 1 year warranty
 - Includes:
 - UV Bulb - approx. 3,000 hours (4 months),
 - cleaning brush, metal chain for hanging,
 - wall mount bracket, 10 ft. cord - 110 VAC
- See reverse side for more information.

Our Customers Say It Best... "The DT1100 allows us to enjoy sitting outside without being coated with chemicals and constantly swatting bugs away." *Berry B., Lorena, TX*

Attract, trap and kill flying insects including mosquitos, biting flies, Asian beetles, wasps, hornets, yellow jackets, moths, stink bugs, no-see-ums and more!

THE SCIENCE OF DYNATRAP

UV

Special UV producing light bulbs ignite a Photocatalytic Reaction between Ambient Organic Matter circulated by the internal fan over the TiO₂ Surface releasing the irresistible Insect lure of CO₂ and H₂O.

CO₂

CARBON DIOXIDE
Insects are lured into the trap by the trail of CO₂ where they are vacuumed up and trapped by the internal fan to dehydrate and die.

ORGANIC MATTER

PHOTOCATALYTIC REACTION

H₂O

TiO₂ TREATED SURFACE

ULTRAVIOLET RAYS

The DynaTrap's special UV bulb generates warmth and UV rays, attracting flying insects night and day.

TITANIUM DIOXIDE COATING

The exclusive TiO₂ (Titanium Dioxide) coated surface produces CO₂ (Carbon Dioxide), irresistible to mosquitos. This occurs through a photocatalytic reaction, when UV rays hit the TiO₂ and organic matter (pulled in by the airflow from the fan) turns into CO₂ and H₂O (water vapor).

POWERFUL VACUUM ACTION FAN

DynaTrap's powerful, yet whisper-quiet fan draws insects into the retaining cage, where they are trapped by the vacuum action, and eventually dehydrate and die (usually within 24 hours). The retaining cage is removable, allowing the contents to be emptied into the trash.
