

JUST ADD WATER A POWERFUL NATURAL ATTRACTANT

- ✓ Pole Stand Included
- ✓ Durable All-Weather Construction
- ✓ No Pesticides/Odor-Free
- ✓ Water Tray Lures Egg-Laying Insects

Combines all of the famous DynaTrap® technology, further enhanced with the natural attracting power of H₂O.

Our award winning DynaTrap® technology uses a 3-way protection plan for insect extermination. A powerful UV emitting fluorescent bulb produces warm and bright light that attracts insects to the unit. The DynaTrap® also produces carbon dioxide, which is irresistible to mosquitoes. After Insects and mosquitoes are lured to the trap, the powerful fan draws them into the retaining cage where they dehydrate and die.

FEATURES

- Indoor/outdoor
- No expensive attractant or propane necessary
- Smokeless – pesticide and odor free
- Operate 24 hours a day, 7 days a week
- Provides up to ½ acre coverage
- Patented Automatic Damper Prevents Insects From Escaping
- Durable all weather construction
- Easy to set up & whisper-quiet
- 1 year warranty
- Includes:
 - UV Bulb - approx. 3,000 hours (4 months),
 - cleaning brush, metal pole stand,
 - water tray, 10 ft. cord - 110 VAC

See reverse side for more information.

is on the way!*

STAND UP TO MOSQUITOES

Now enjoy the freedom to place your trap where you need it most. The convenient pole stand allows you to target specific areas of your outdoor space for optimum insect control. This 3' stand is durable and made for all types of weather!

Our Customers Say It Best... "It is so pleasant to sit outside in the evening BUG FREE!!!" - Connie H., McKinney, TX

Attract, trap and kill flying insects including mosquitos, biting flies, Asian beetles, wasps, hornets, yellow jackets, moths, stink bugs, no-see-ums and more!

THE SCIENCE OF DYNATRAPH

UV Special UV producing light bulbs ignite a Photocatalytic Reaction between Ambient Organic Matter circulated by the internal fan over the TiO₂ Surface releasing the irresistible Insect lure of CO₂ and H₂O.

CO₂
CARBON DIOXIDE
Insects are lured into the trap by the trail of CO₂ where they are vacuumed up and trapped by the internal fan to dehydrate and die.

ORGANIC MATTER

PHOTOCATALYTIC REACTION

H₂O

TiO₂ TREATED SURFACE

1 ULTRAVIOLET RAYS
The Dynatrap's special UV bulb generates warmth and UV rays, attracting flying insects night and day.

2 TITANIUM DIOXIDE COATING
The exclusive TiO₂ (Titanium Dioxide) coated surface produces CO₂ (Carbon Dioxide), irresistible to mosquitoes. This occurs through a photocatalytic reaction, when UV rays hit the TiO₂ and organic matter (pulled in by the airflow from the fan) turns into CO₂ and H₂O (water vapor).

3 POWERFUL VACUUM ACTION FAN
Dynatrap's powerful, yet whisper-quiet fan draws insects into the retaining cage, where they are trapped by the vacuum action, and eventually dehydrate and die (usually within 24 hours). The retaining cage is removable, allowing the contents to be emptied into the trash.

ATTRACTING POWER OF H₂O: This Dynatrap includes a water tray that collects rain water and attracts egg-laying insects. When insects get close enough to try to lay their eggs, the Dynatrap's powerful fan draws them into the retaining cage where they dehydrate and die.
