Certifications

Technical Data

Grinder Type	Precision Burrs
Number of Hoppers	1 Hopper
Plug Type	NEMA 5-15P
Style	On Demand
Type	Espresso Grinders

Notes & Details

Grind up to 2.65 lb. of espresso beans in just 2 minutes with the Estella Caffè ECEGOD on demand espresso grinder. Designed for quick, easy operation, this model lets you freshly grind your espresso beans in the quantity you want exactly when you need them. Simply place a portafilter underneath and push a button to grind the perfect amount of ground espresso directly into the portafilter head. The grinder holds the portafilter while the grounds are being added so that your staff can start the process and then focus on other tasks until grinding is complete.

Because this unit only grinds the amount of beans you need at any given time, you can be sure the grounds are always fresh for top-quality flavor. Programmable single and double doses let you press one button to get exactly the amount of coffee grounds you need. It can also operate in a continuous "on" mode if needed to grind larger quantities of beans.

Also, this model has 8 precision coarseness settings. Simply turn the adjustment handle and lock it into place with the set screw. Plus, the 64mm burrs feature a steady lock to provide consistent results no matter what setting you use. The heavy-duty aluminum base keeps the grinder stable during operation. This unit is designed with reliability in mind so it is ready to stand up to heavy use in your commercial coffee operation. Plus, it operates quietly to reduce ambient noise in your coffee shop or cafe. This model offers 360W of power and requires a 120V electrical connection for operation.

Estella Caffè equips businesses with the convenience and quality of high-end coffee equipment at a fraction of the cost of other brands. From bean grinders to automatic espresso machines, each unit combines the ease of intuitive technology with the performance of an experienced barista.
