Certifications

Technical Data

Press Dimensions	18" Round
Press Shape	Round
Type	Pizza Dough Presses

Notes & Details

Efficiently create pizza crusts with a consistent size and thickness by adding this Estella DPC18NH 18" manual clamshell pizza dough press to your pizza shop, italian restaurant, or cafeteria. This model features large 18" diameter aluminum plates that can flatten dough up to 18" in diameter. Made to press warm pizza dough to 60% of the finished size, this press saves time since the dough can be partially flattened in the press and only needs to be finished by hand.

This unit doesn't require an electrical connection because it isn't heated, so it's great for catering applications or outdoor venues where electrical connections aren't available. Use it paired with a propane or wood fired outdoor pizza oven (sold separately) to set up a fresh-made pizza station at weddings, country club events, festivals, or fairs!

Great for busy foodservice businesses where labor is a premium commodity, this press helps to save time in your commercial kitchen. It offers a sturdy design and is small enough to fit on a countertop or equipment stand. The white finish looks sleek and professional so that you can even use it in display cooking areas so customers can see their pizzas being made fresh! Since it offers easy and precise thickness control and an ergonomic handle, this dough press will improve production times, increase quality, and save labor.
