Notes & Details

Equip your kitchen with the ultimate utility mixer to whip up small batches of breads or desserts with this Estella EMIX8G 8 qt. programmable bowl lift commercial countertop mixer with a bowl guard! This mixer has a gear driven 4/5 hp motor that offers robust mixing capabilities. With 5 variable speeds, this unit is a versatile choice for making cakes, whipping potatoes, or aerating egg whites. It can handle any of your favorite recipes with a maximum of 2.2 lb. of flour per batch.

This unit comes with one of the most intuitive control pads in the industry. Featuring an easy-to-use digital touchpad with 6 programmable functions and a 30 minute timer, you can be sure your recipes are always consistent no matter who is making them. Speed, time, and program selections can be controlled with the simple push of a button.

For an added level of safety, this mixer comes with a bowl guard. The clear plastic guard lets you see the mixing process taking place but still keeps any unwanted objects from coming into contact with the food or a moving beater. It also helps to block any splashes from the batch you are mixing. The guard has an ingredient pour spout to make it easy to add ingredients as you mix. It also includes a sliding door for an even greater area of visibility and to add ingredients to the bowl. This bowl guard is perfect for preventing injuries and accidents to ensure that your end product is safe and free from contaminants. For user convenience, the mixer can operate without the guard in place. As a safety feature, the mixer will not run unless the bowl is in the raised position. A convenient audible alarm will sound if the bowl is not properly positioned. The simple, spring-assisted bowl lift makes it easy to lift and lower the bowl.

So you can get this mixer ready to use right away, it comes with a full complement of accessories. This unit comes with an 8 qt. stainless steel bowl to handle any recipe large or small. The bowl has a convenient carry handle that helps to make pouring and scraping more efficient. Plus it has all stainless steel accessories including a wire whip, a dough hook, and a flat beater so you can handle any mixing task.

To increase the value of this unit to your kitchen, it has a #5 attachment hub. You can attach your Estella #5 meat grinder or pasta set (sold separately) to make the most of this unit and your precious counter space. To make using the hub attachments even easier, the bowl may be completely removed and the mixer will run without it. Keep in mind that the mixer head will still rotate when you are using a hub attachment.

This mixer requires a 120V electrical connection for operation and has an output of 600W.
