2CB5 Filter Cartridge: EV9617-05

APPLICATIONS

Coffee
Cheese melters
Water coolers

Low volume applications
[approx. 14.66 gpd (55.5 Lpd) nominal
consumption] at a tested recovery rating
of 40.17%

FEATURES • BENEFITS

System includes mineral reduction processor, carbon filter cartridge, post carbon filter cartridge, high efficiency GRO-75EN Reverse Osmosis Cartridge, air gap faucet and storage tank

Improves equipment life and performance by removing at least 95%+ of all dissolved solids that cause scale buildup

Especially useful on Water Coolers (Office Coffee Service - OCS installations), and other evaporative equipment that are not emptied each day

Less frequent deliming of equipment means reduced maintenance and service costs

Heating surfaces maintain peak heat transfer efficiency, reducing cycle times and energy consumption

NSF/ANSI Standard 58 certified to reduce cysts such as *Cryptosporidium* and *Giardia* by mechanical means

Protects against taste- and odor-causing contaminants while removing dirt, particulates and dissolved minerals

Two-part design makes installation flexible and small footprint easily fits in any office kitchen

Sanitary cartridge replacement is simple, quick and clean; internal filter parts are never exposed to handling or contamination

INSTALLATION TIPS

Choose a mounting location suitable to support the full weight of the system when operating.

The tank assembly may be placed above, below or alongside (preferred) of the water processor assembly.

Install vertically with cartridges hanging down.

Allow 2-1/2" (6.35 cm) clearance below the cartridge for easy cartridge replacement.

The water inlet must supply a minimum of 40-125 psi (2.7-8.6 bar), non-shock.

Delime equipment prior to application.

OPERATION TIPS

Replace the Everpure 2FC5-S and 2CB5 Carbon Cartridges every 12 months
Everpure GRO-75EN RO Membrane Cartridge every two (2) years, or as needed

SIZING

Service Flow Rate: 0.052 gpm (0.197 Lpm)

EVERPURE® LVRO-75HE REVERSE OSMOSIS (RO) SYSTEMS

EV9975-00 • EV9975-10

System Tested and Certified by NSF International against NSF/ANSI Standard 58 for the reduction of:
Total Dissolved Solids (TDS)

The contaminants or other substances removed or reduced by this drinking water system are not necessarily in your water. Do not use with water that is microbiologically unsafe or of unknown quality without adequate disinfection before or after the system. Systems certified for cyst reduction may be used with disinfected water that may contain filterable cysts.
