Features	NSF Listed
Handle	With Handle
Material	Stainless Steel
Shape	Rectangle
Type	Cheese Blockers

Notes & Details

Smoothly cut any type of cheese with this durable Garde CHEESBLKW stainless steel small cheese blocker. With a floating wire design, this blocker will ensure that blocks of cheese are cleanly sliced and ready to sell or add to a recipe! By pulling up on the ergonomic handle, the wire raises above the platform. To cut, lower the wire and pull it through the cheese.

This Garde cheese blocker is equipped with a stainless steel cutting wire, allowing you to cut through cheese of all densities and thicknesses. Plus, thanks to the thin opening running the length of the blocker, the wire lifts from below when needed, but stores safely against the unit when not in use. The stainless steel cutting wire on the cheese blocker is easily replaced, and the water-resistant stainless steel construction ensures long-lasting, durable use. Non-slip rubber feet ensure that the blocker stays safely in place while you cut.
