# Notes & Details

Increase efficiency and keep production moving at your bar, restaurant, catering kitchen, or institution with the Garde CORE8 8 section apple corer! This dependable, rugged corer allows you to cut apples, lemons, limes, and oranges for a drink garnish or to create delicious baked goods, grab-and-go snacks, or healthy side dishes.

With an 8 section blade, this wedger consistently creates uniform slices for your facility while simultaneously removing the core. When your employees arrive in the morning, they can quickly cut dozens of fruits at a time and store them away for later. Then, when the lunch rush hits your establishment, you'll be prepared for high-demand orders and won't be wasting valuable time cutting food by hand.

Featuring razor-sharp stainless steel blades, this corer cuts cleanly and precisely in one swift, fluid motion. Simply press down on the push block and watch as your product is smoothly transformed into 8 sections and the core is removed. Thanks to the user-friendly design, even your newest employee will have no trouble operating this corer.

Because the stainless steel blade assembly is resistant to corrosion, you'll never have to worry about blade contact with acidic fruit juices. The sturdy cast aluminum base construction holds up to the wear and tear of tough, daily use, while also providing years of reliable service. To ensure stability on your countertop, the four rubber feet keep the unit from sliding during operation. For easy maintenance, the blade assembly and push block come apart quickly when it's time for cleaning.
