

## DOUBLE FLANGE PALLET RACK CROSSBAR

The double flange crossbars assist in supporting pallet loads and are positioned between two beams. Double flange crossbars hang over the edge of beams and are available for use with unslotted or slotted beams.

### Double Flange Pallet Rack Crossbar

- Galvanized steel finish.
- Pallet rack beams longer than 90", one double flanged pallet rack crossbar across is required to prevent spreading or bending of the beams.
- Pallet rack beams longer than 126", additional double flanged pallet rack crossbars are required.
