The perfect addition to any preschool learning space, these building tables encourage kids to use their imagination while improving their fine motor skills. One 20" x 20" preschool brick compatible base is permanently mounted to tabletop. Side rails keep bricks from falling off the table while the handy built-in storage on each end easily stores loose bricks. The tabletop is large enough to accommodate multiple children at one time, but small enough to fit in an activity area. The removable cover allows the table to be used for other activities and stores below tabletop when not in use. Shelf below tabletop includes three Clear Tubs with Lids for additional brick and accessory storage.
