Features	Footrest Self-Leveling
Finish	Powder-Coated

Technical Data	
Material	Cast Iron
Type	Table Bases
Usage	Indoor

Notes & Details

Whether you're opening your first restaurant or are looking to replace the old tables in your bar, we've got the perfect product for you. With the Lancaster Table & Seating cast iron 22" x 22" black 3" bar height column table base, you can create a comfortable dining area for customers in your establishment!

A heavy duty, cast iron, cross shaped base offers durability and stability to your table. It also includes (4) self-leveling feet. These levelers help keep tables secure and balanced when placed onto irregular or uneven floors. They can accommodate up to a 1/4" variance in the level of floors and lock into place for superior stabilization. This helps eliminate customer complaints and accidental spills caused by a wobbly table. Plus, the included chrome foot ring lets your customers rest their feet, as opposed to dangling them, for a more comfortable dining experience.

The base column is made of durable steel to support the heavy weight of table tops and their contents. It measures at 3" in diameter with a threaded interior rod that easily affixes to the spider plate. The spider is made of a heavy cast iron with 8 pre-drilled holes for the included pan head screws to secure the column to the tabletop. This base is able to hold up to a 30" round or square tabletop by itself, without the support of additional bases. It is finished with an attractive black powder coat for a sleek, professional appearance.
