Notes & Details

Enhance the efficiency and functionality of your outdoor waste management system with the Lancaster Table & Seating rain bonnet lid. Designed with an easy-to-use round top opening with a rounded covering, this rain bonnet lid is a practical addition to your outdoor trash cans that keeps trash mostly concealed and helps prevent trash from getting overly wet when it rains. The convenient wide opening allows for effortless one-handed waste disposal, promoting a clean and tidy environment for your patrons. Its sleek black color not only presents a professional appearance but also complements the LT&S slatted and perforated steel outdoor cans, creating a cohesive waste management system that is both functional and visually appealing.

Constructed with a heavy-duty design, this rain bonnet lid is built to withstand outdoor elements, making it an ideal choice for parks, municipalities, and schools. For a more secure lid attachment, pair this lid with a security cable (sold separately) to ensure the lid stays on when there is weather, wind, vandalism, or theft. Whether you're looking to upgrade your current waste disposal system or simply need a reliable solution for outdoor use, this Lancaster Table & Seating rain bonnet lid is the perfect choice to keep your outdoor spaces clean and organized. With its durable construction and user-friendly design, this rain bonnet lid is a practical investment for any commercial setting requiring efficient waste management solutions.
