- Adjustable legs raise the unit to your ideal working height

Lavex

Technical Data

Roller Material	Galvanized Steel
Style	Roller Conveyor
Type	Gravity Conveyors

Notes & Details

Upgrade your material handling system with this Lavex gravity conveyor. Ideal for use in warehouses, shipping departments, and assembly areas, this conveyor can be used in both permanent and temporary conveyor lines. This handy set includes the conveyor frame, rollers, and stationary support legs. This durable unit boasts a 12 gauge steel frame with a blue powder-coated finish. It requires no motor to operate, providing a simple, cost-effective solution for transporting products in your facility.

This model features an ample 10' length with a usable width of 16" between the frames to transport product. It features 1 1/2" diameter rollers constructed of heavy-duty galvanized steel, ensuring it can withstand frequent use in your industrial facility. These rollers have 6" centers between each. For additional versatility, this model features stationary, adjustable legs. These legs can adjust the working height of the unit from 23" to 38 1/4", and they can be pivoted so that one end of the conveyor is higher than the other.
