Notes & Details

Increase the efficiency of your waste removal operation with this Lavex Pro 23 gallon blue slim rectangular recycling bin with blue mixed recycling lid. Perfectly proportioned for use in restaurants, schools, offices, and hotels, this item is a wonderful addition to high-traffic areas where space is at a premium! While its lid slot makes it easy to recycle paper, bottles, and cardboard, its ample 23 gallon capacity ensures that your daily accumulation of recyclables doesn't overflow onto the floor. The lid also helps promote a clean, professional appearance by concealing unsightly waste. Made with heavy-duty, durable resin, this bin is designed to withstand the rigors of any fast-paced environment. Plus, it's simple to wipe clean and resistant to chips, dents, and bending for long-lasting reliability that you can trust!

Built with the busy cleaning crew in mind, this item comes with integrated venting channels that are large enough to enable ample air flow around and below trash liners to reduce the vacuum effect that's caused by lifting them out. This added air circulation makes removing the liners significantly easier when compared to traditional bins, and it also features a foot assist for quick and simple liner removal - just step on the can to hold it flat on the ground while you remove the bag! Additionally, the bin's slim shape guarantees a superior fit in smaller spaces, while bags cinch in the handles to help keep them tightly in place. Keep your facility clean and organized with this recycling bin by Lavex!
