

HARD HATS

DAX FULL BRIM

FIBER RESIN POLYMER (FRP)

FEATURES

- **Shell** – Made from fiber reinforced resin to withstand impacts.
- **Internal Liner** – Using a six-point suspension system to provide superior impact absorption.
- **Padding** – Perforated Clarino® synthetic leather comfort dome with molded EVA foam insert for additional shock absorbing protection to the top of head.
- **Retention System** – Using our uniquely designed LUX Suspension System to provide better retention. The ratcheting fitment dial allows for rapid head size adjustment and is easy to grip and manipulate with gloves on. The ratcheting system lies on the occipital lobe, providing stability and comfort.
- **Brim Grip** – A staple feature on all our premium hard hats is designed to provide a better grip.
- **Brow Pad** – Synthetic leather is durable and provides better sweat absorption than standard brow pads.
- Designed to offer outstanding protection in hot and dangerous industries, the DAX Hard hat shell has been tested to radiant heat loads producing temperatures up to, but not exceeding, 350° F (177° C).

DURABILITY

- **5 Year Average Lifespan**
Hard hat lifespan may vary depending on the conditions of each work site. Hard hats subjected to more wear and tear or used outdoors in direct sunlight may need to be replaced more frequently. Daily inspections are the best way to determine when to replace a hard hat shell, suspension, or the entire unit. Suggested replacement is based on service life (Based on when the hard hat was placed into service, not the manufacture date).

As a general guideline we recommend replacing hard hats every five years regardless of outside appearance, but this can vary due to use and job site conditions
