

Stringlights Metal & Plastic Guards

For tough, temporary lighting shipped complete with guards to place in your own bulbs, our stringlights can't be beat. The rugged cable is high visibility yellow and can withstand the toughest treatment. The TLS has hanging holes on each socket allowing installation with either spikes or S-hooks. Each model comes standard with metal or plastic guards to deter theft and a connector, (TLS-100CG14LED does NOT have a connector).

**See tables below for models and specifications*

Replacement Guard:

P/N **TLS-SJ14** (plastic)

Replacement Guard:

P/N **TLS-MGC** (metal)

KEY BENEFITS

- Incredibly durable design will ensure long term use without damage or downtime.
- Can be linked together for longer runs.
- Highly visible yellow cable with grounding.
