Notes & Details

Efficiently dispense water using this Narvon 20 GPH undercounter water dispenser with chilled, ambient, and sparkling water options and 3 taps. This water dispenser boasts a durable stainless steel construction, while its undercounter design fits conveniently under your counter to save valuable counter space. It includes a counter-mount column tap dispenser with 3 taps so you can serve 3 different types of water. The taps feature a sleek, chrome-plated finish, and they're spring-loaded so that the water is turned off automatically when the taps are not in use, preventing waste and mess.

This unit dispenses 20 gallons of chilled water per hour and it is also able to dispense ambient and sparkling water with a CO2 cylinder (sold separately), making it a convenient solution for busy restaurants, airports, or offices. It allows you to adjust your water temperatures, serving cold water from 41-53.6 degrees Fahrenheit and ambient water from 60.8-89.6 degrees Fahrenheit. This dispenser is equipped with a 3.7 gallon ice bank. With convenient push connect fittings, it is easy to install. To prevent your unit from overheating, this dispenser includes a conveyor that pushes warm air out through a single opening, ensuring optimal heat dissipation. This dispenser uses R-290 refrigerant and it requires a 120V electrical connection for use. Effortlessly serve a variety of water options to staff and guests with this Narvon water dispenser!

Kit Includes:

- 20 GPH undercounter water dispenser
- Chrome-plated column tap dispenser with 3 taps
