

PA-45-LGR COMPACT DEHUMIDIFIER

85/145 PINTS

Available Colors

PRODUCT FEATURES

- High Efficiency Rotary Compressor
- High Airflow Filter System
- Advanced Recessed and Easy-to-Operate Digital Control Panel
- Stackable Up to 3 Units High

The PURAERO PA-45-LGR Compact LGR Dehumidifier outperforms many of the leading compact dehumidifiers in its class, delivering more airflow than competing similar sized units. The PA-45-LGR extracts a massive 85 pints per day at AHAM (80°F, 60% RH), which far exceeds the competition by more than 10% in similar conditions. At a mere 20 inches tall, the PA-45-LGR is half the height of traditional upright commercial dehumidifiers, allowing the unit to dry in tight spaces such as crawl spaces, basements and/or places where taller units don't fit. The roto-molded plastic housing design, allows the dehumidifier to be compact and lightweight, helping technicians move and transport the unit with ease from jobsite to jobsite. In addition, the deeply molded interlocking housing design helps securely stack the PA-45-LGR for storage and transport and includes an easy-to-read digital display to allow contractors to comfortably operate the machine.

SPECIFICATIONS

Volts / Cycle / Watts	115V / 60Hz / 460W
Amps	4.2A
Maximum Air Movement	300 CFM
Water Removal	85 AHAM / 145 SAT PPD
Operating Range	33°F - 105°F
Refrigerant Type	R410a
Noise Level	72dB
Unit Size (LxWxH)	25.21" x 15.11" x 20.11"
Unit Weight	52.9 lbs.
Drain Hose	25'
Power Cord	25'
Safety Certification	ETL/CETL
Xactimate Code	WTRDHM>(L)
Warranty	1 Year – Parts & Labor 5 Years – Housing
