

New POURAWAY GRANITE-LOOK CADET

POURAWAY® CADET™

PourAway's beautifully crafted Granite-Look Cadets feature subtle patterns that mimic natural stone. When your environment calls for a high-end look the granite cadet will blend with the modern elements of your surroundings. These durable and versatile cadets come in 3 popular granite colors that give the appearance of natural grey, blue and brown stone for a premium look. Suitable for both indoor and outdoor applications, this revolutionary product will look environmentally sophisticated in every décor.

The PourAway Recycling System was created to address a fundamental sustainability need, removing liquids from the waste stream. Whether for the purpose of reducing waste hauling costs, providing safety or reducing greenhouse gas production, the PourAway Cadet has you covered. And if you are in California (Senate Bill 1383), Connecticut, Massachusetts, Rhode Island, or Vermont organic liquid is considered organic waste and must be removed from the waste stream.

PourAway Cadet™ is the ultimate in quality and durability - engineered to manage the extreme demands of liquid waste capture.

- Sturdy handle with commercial grade wheels makes moving the PourAway® Cadet™ easy and safe along with caster brakes for locking into place.
- The highly visible liquid level gauge shows full at 23 gallons, but the cadet holds 30 gallons of liquid safely.
- Removable aluminum strainer keeps solids from clogging the unit and is easy to clean.
- Wide drain hose for quick and easy emptying with rust-resistant hardware.
- The tank can be cleaned with any microbial solution and is easy to maintain.
