

QUIK N' CRISPY

GF5

The Quik n' Crispy Model GF5 uses a combination of forced hot air, radiant heat, and an elevated, perforated cooking basket to prepare ovenable frozen foods to the taste and texture as if they were deep-fat fried. Crispy on the outside and moist and tender on the inside. The GF5 has a maximum temperature of 425°F, which results in cooking times and temperatures that are similar to deep-fat fryers for french fries and other menu items. Prepare and serve menu items that are deep-fat fryer quality, without the mess or hazards of hot grease!

Model GF5

- Offer healthier foods - hot air fried foods are 20% - 40% lower in fat
- Increased speed of service
- Prepare french fries, egg rolls, corn dogs, chicken tenders, tacos and other "fried foods"
- No exhaust vents required
- Easy to program thanks to the easy-to-use LCD touchscreen controller
- Safer for employees since there is no hot grease

FEATURES

- Create and edit up to 15 different recipes with names, temperatures, and times
- USB port to import and export recipes to different machines in your business
- Carbon, grease, and electrostatic filters
- Double your output by stacking two GF5s with the optional stacking kit
- Constructed from stainless steel
- Bristle brush and dough cutter included
