Type	Nozzles

Features

- For use with compatible Regency hose reels (sold separately)
- Enables simple and easy rinsing
- Double trigger locking mechanism allows prolonged use
- Quick disconnect feature allows effortless attachment and removal
- Flow rate of 5 GPM

Notes & Details

Add versatility to your hose reel with this Regency 5 GPM water nozzle. This helpful tool attaches onto the end of your hose to provide a quicker and easier way to rinse items, and it has a quick disconnect feature to easily remove and attach as needed. It features an impressive rate of 5 GPM for efficient water flow. It also includes a double trigger lock to ensure easy use during extended spray sessions.

This unit can be used as an additional accessory for your hose, or as a direct replacement for the one that came standard with your hose reel kit. The adapter has a 3/8" female NPT inlet. This tool should not be used with foodservice pre-rinse faucets due to the high GPM.
