Notes & Details

Give your customers the convenience of having a way to carry their goods without needing to push around a bulky cart. The Regency black 21 1/4" x 16 1/2" plastic grocery market shopping basket with wheels is the ideal solution for delis, supermarkets, and convenience stores. Constructed of durable plastic, this basket is both resilient as well as lightweight.

This basket offers versatility by having two different methods of transport. A carrying handle allows you to pick up the basket and carry it like a more traditional basket. For heavier loads, a telescopic handle paired with rear wheels lets your customers effortlessly push or pull the basket behind them. The design of the basket does not allow for any water build-up, making it capable of being kept outside of your establishment as well as inside, without worry of water being tracked inside. To save on space, these baskets can be stacked when they are staged for customer use or when placed into storage. The smooth plastic construction is also easy to clean and maintain.
