## Notes & Details

Take the hassle out of transporting heavy kegs with this Regency 12" keg dolly with casters! From the truck into storage, this dolly is designed to do the heavy lifting for you. Sitting atop 4 durable casters, easily maneuver your 1/6 size barrel kegs or slim 1/4 size barrel kegs through your establishment and into storage. It even handles Cornelius Kegs for small batch brews! Using a dolly requires less strain on employees while reducing the chance of injury. For added stability, the rigid top surface and raised edge help keep kegs in place.

Made of durable plastic, this dolly can go straight from storage to the refrigerator without the need to remove your heavy keg. It can withstand cold temperatures, making it easy to arrange heavy kegs even in your walk-in refrigerator. Use a Regency Keg Stacker (Sold Separately) to stack 2 kegs on one dolly for even more efficiency when handling large quantities. Ease the burden on your bartenders by using this dolly to quickly transport kegs in a hurry!
