Notes & Details

Perfect for busy commercial kitchens, this Regency wall mount faucet with 6" swing spout is an excellent choice when you need a reliable, affordable water fixture for your facility! Designed to be easy to install and easy to maintain, it's easy to see why Regency faucets are a great solution for any business. Thanks to a 6" long swing spout, this faucet delivers water exactly where you need it, and the moveable design lets you adjust it to fill multi-compartment sinks or maneuver around larger cooking vessels.

Water exits the faucet through a 2 GPM aerator, which creates a soft flow pattern with minimal splashing. The faucet installs on your wall or sink backsplash on a pair of 8" centers and connects to the facility water lines with a set of 1/2" NPT inlets. The faucet body is made from chrome-plated brass that complements nearly any design aesthetic, and the water flow is controlled by a pair of simple lever handles. An installation kit is required for setup (sold separately).
