- 1/2" NPT water connection
- 115V

Certifications

5-15P

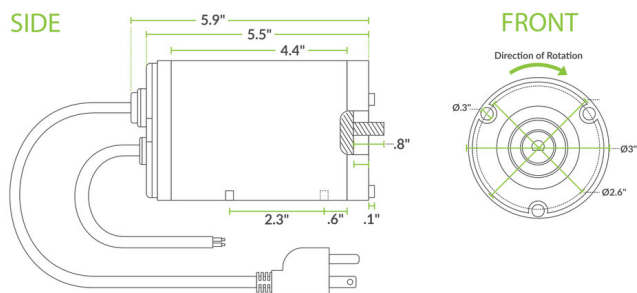

1/2" Water Connection

ETL, US & Canada

## Plan View

## Notes & Details

Use this Regency utility water pump to replace a broken one on your portable hand sink cart. Your sink's water pump provides a steady flow of water when it's needed, and a broken pump can quickly put your hand washing station out of commission, so it's a good idea to keep a spare on-hand to minimize downtime and make quick repairs. The self-priming pump features a quiet, 3-chamber diaphragm design with a protected ignition. It has a 2.0 GPM flow rate, and connects with a 1/2" NPT water connection. A 6' cord with NEMA 5-15P plug lets you connect it to an electrical outlet.
