Notes & Details

Perfect for a wide variety of wine storage applications, this 14" x 30" 3 shelf black epoxy wire wine rack with 64" stationary posts can hold up to (84) 750 mL bottles! This shelving unit includes 2 wire wine rack modules and all of the components for a 14" x 30" x 64" shelving unit to hold them. The modules come fully assembled and the shelving unit is very easy to put together; you don't even need tools to assemble the shelves. Plus, clear plastic ties are included to ensure that the wire wine rack modules are properly secured to the shelving.

As an economical wine storage option, this wire wine shelving unit is a great choice for restaurants, cafes, and shops that offer a wide selection of wines! When bottles are placed in this rack, each label is clearly visible so that your customers or staff can quickly select the bottles they are looking for. With its black epoxy finish, this wire wine rack will fit in nicely with your front of the house decor or back of the house storage area. Plus, since the components of this shelf kit are coated in black epoxy they are more resistant to corrosion than chrome shelves and may be used in damp or coastal conditions.

When this kit is fully assembled, the lowest shelf will be 7" from the ground which means that your wine will be stored in a safe and sanitary manner. The middle and top shelves will be at 35 1/2" from the ground and at the top of the unit. While only three shelves are required to assemble this shelving unit, this kit includes an additional shelf that may be used to provide more support or low storage space for wine bags or boxes!

Kit Includes:

- (2) 26 1/2" x 26 1/2" x 8" black epoxy wine modules
- (3) 14" x 30" black epoxy wire shelves
- 16 pairs of split sleeves for shelf installation
- (4) 64" stationary black epoxy shelving posts
- (12) 9 1/2" clear plastic ties
