Type	Shelving Kits
Usage	All Environments Dry Environments Kitchens Moist Environments Walk-Ins

Notes & Details

Keep your storage area organized with this Regency 30" x 60" NSF green epoxy shelf kit! This kit includes (4) 30" x 60" wire shelves and (4) 74" posts, which allows you to create a convenient storage solution for your warewashing area, walk in cooler, or seaside concession stand. Since this shelving unit has a green epoxy coating, it is the perfect choice for dry, moist, or humid environments. Able to accommodate an impressive 450 lb. of evenly distributed weight, each shelf can be used for displaying everything from light, fluffy cakes to heavier items like cases of frozen meats or vegetables.

Each shelf features a wire construction that does a great job of allowing proper air flow around your stored supplies, which is especially important in ensuring the maximum shelf life possible. Since the posts are marked in regularly-spaced intervals and use a split sleeve system of assembly, the shelves are easy to move higher or lower along the posts. This is especially great for expanding businesses that may not have finalized their product offerings.
