Notes & Details

Hold and transport a wide variety of your most popular baked goods with the Regency fully welded 20 pan end load nesting bun pan rack. This item uses a z-shaped nesting frame to provide users with a valuable space-saving design that's perfect for storage areas and kitchens with limited room. When not use, the racks can be pushed into one another, rather than having to position them side by side, ensuring the extra space can remain available for storage, prep work, or even allowing your staff to move freely throughout the area. The sheet pan rack can accommodate up to 20 full size sheet pans or 40 half size sheet pans, with an overall holding capacity of 795 lb. Integrated rail-type ledges are spaced at 3" intervals and not only offer sturdy support, but ensure safe and easy transport of your pans.

The rack is mounted on four 5" casters, including two with brakes, for effortless mobility throughout any commercial kitchen or bakery. For added convenience, this item comes pre-assembled and ready to use right out of the box! This saves significant time and labor during setup. Users can simply unpack it, place it in its desired location, and proceed to put it to use. And with a fully welded construction, you can be sure this rack will be both strong and durable.
