Notes & Details

This Regency heavy-duty 5" polyurethane caster with brake helps turn any work table or equipment stand into a mobile work station. Unlike a stationary table or stand, a unit on wheels does not require multiple people to carry and relocate it for cleaning or maintenance; one employee can easily and quickly roll it aside whenever necessary! The attached brake also secures the unit in place for stationary applications, such as equipment operation or meal preparation. As a result, the caster provides maximum versatility. And, with a 300 lb. weight capacity, it provides excellent durability for heavy-duty needs.

Designed for smooth transportation, the caster even helps keep items on the surface of the table as still as possible, preventing any spills or falls. With a 5" diameter, the caster also raises the equipment or table by 6", which can help lift the work area to a more comfortable, ergonomic height.
