Notes & Details

Keep your dish racks organized and easily transport them from one area of your installation to another by using this Regency 8 shelf glass rack cart with 8" spacing! Designed to hold up to 8 glass racks or dish racks no more than 8" tall, this cart is made of heavy-duty aluminum for durability and longevity. It makes it easy to store and transport several glass racks at once and is easier to use than traditional glass rack dollies since you can remove one glass rack at a time without the need to disassemble an entire stack of them.

To ensure easy mobility, this model has 5" non-marking swivel casters that let you roll it from the dish room or storage room to the banquet room or service area! Even when used as stationary storage for unused glasses, the dolly will help you save space and be ready to roll whenever you need. Since this cart is made for use in high volume venues, it's great for convention centers, banquet facilities, hotels, and restaurants! This item is fully welded, making it ready to use right out of the box.
