Notes & Details

Provide plenty of space to rinse china and glassware, remove scraps, and load warewashing racks by adding this Regency 7' stainless steel soil dish table to your warewashing system. This table is made of 16 gauge type 304 stainless steel for long-lasting durability and has a built-in 20 1/4" x 20 1/4" x 6" pre-rinse sink punched for a standard basket drain. Plus, this unit is supplied with holes on 8" centers for the installation of a pre-rinse faucet (sold separately).

It also has a 10 3/4" backsplash to protect your walls from water damage and impact from warewashing racks and a 2" return on the sides to help contain excess water that drips from your dishes and aid in draining. This dish table has a straight design and is made to connect to the side of your dishmachine. The 1 5/8" diameter stainless steel legs come equipped with welded cross-bracing to provide additional support for heavily loaded dish racks.
