Notes & Details

Clean hands and proper emergency preparedness measures keep all aspects of your business running smoothly, and with this Regency 17" x 15" hand sink and eyewash station, you'll be able to meet health code regulations and help promote a cleaner, healthier work environment for you and your customers. This easy-to-clean, easy-to-install compact sink easily fits in tight spaces and securely attaches to the wall, opening up floor space for other uses.

It features 20-gauge stainless steel construction on the top and bowl, which provides the durability needed to stand up to daily wear and tear, at a price point that won't break the bank. Type 304 stainless steel is used to give the sink additional corrosion resistance where you need it most. It features a 14" x 10" x 5 1/2" bowl with no-drip countertop edge that keeps splashes and spills contained and encourages water to flow down into the sink bowl, rather than sitting on the sink or dripping down the side and onto the floor.

This sink also comes with a faucet with an 3 1/2" gooseneck spout and a pull-activated eyewash station, which lets you use it for normal hand-washing and quickly convert for emergency eyewash applications if needed. Great for laboratories, battery charging stations, or even high-dust applications like construction sites, the eyewash is activated by a simple pull knob. Each outlet head delivers a soft, aerated flow of water for thorough eye rinsing, with adjustable angles and dust covers to protect it when not in use. The faucet installs through the pre-drilled holes in the sink's backsplash (4" centers), making it easy to attach it to your water lines. A 1 1/2" IPS removable drain basket makes it easy to catch debris and remove it for easy clean-up. An 8" high backsplash guards your walls against water, dirt, and debris.
