Notes & Details

Maintain a sanitary environment in your auto garage, distribution center, or manufacturing facility by giving your employees a convenient way to quickly wash their hands with this Regency single-hole hand sink with hands-free sensor faucet! Made of rugged 16 gauge type 304 stainless steel, the sink is not only rust- and corrosion-resistant, it's extremely durable and built for everyday commercial use. This wall mounted sink station includes 1 set of holes for single-hole faucets. The spacious 8" deep sink bowl is designed to maintain cleanliness in your business and prevent the spread of germs.

For ease of use on day one, this package includes a Waterloo EFWM wall-mounted hands-free sensor faucet. It features an 6 3/16" high gooseneck spout on a single hole base to provide a contemporary and refined look wherever it's installed. Because a sensor activates the water flow, it has several advantages over a traditional handle-style faucet. It is hands-free, which reduces the opportunity for germs to spread, and it also prevents the faucet from running when it's not needed, which helps to cut down on your water bill. A mixing valve also allows you to easily set the output temperature to the desired level. This prevents burned hands from water that is too hot, while still ensuring that the water is warm enough for users to effectively wash their hands. As an added bonus, these sensor faucets are NSF61 / 372 compliant.

Designed for wall mounting, the sink comes with (2) 1 5/8" tubular wall brackets and 2 stainless steel Z brackets. A 10" high back splash protects your walls from splashing and water damage, and a 3 1/2" drain basket keeps your drains clog-free. For faucet installation, an AC adapter is provided to power the faucet's control module, which installs below the countertop and connects to the faucet with an elbow and a 30" flexible supply line. You can also use (4) AA batteries if an outlet isn't convenient, and to provide backup power in case of an outage. A pair of 18" flexible stainless steel connectors with 1/2" NPSM female x 3/8" female compression fittings connect the mixing valve to your building's water lines.

Kit Includes:

- (1) Regency 18" x 17 1/2" single-hole multi-station hand sink for 1 wall mounted faucet
- (1) Waterloo EFWM wall-mounted hands-free sensor faucet with 6 3/16" gooseneck spout
