Notes & Details

This Regency four compartment stainless steel sink is perfect for dishwashing applications, with a 24" x 24" x 14" sink for each of the three stages of the washing process and one left over to soak dishes. And with a 24" drainboard on each side of the sink, it also provides the space needed for drying pots, pans, and dinnerware.

Made of durable 16 gauge, 304 type stainless steel, the sink is sure to withstand constant use in a bustling commercial environment. Because it uses 304 stainless steel, the metal won't rust or corrode, nor will the stainless steel legs and sockets. For added structural strength, the legs include H-shaped braces, which ensure that all parts of the sink are properly supported at all times. A set of stainless steel bullet feet provide stability and also let you make minor height adjustments to get your sink level.

Faucet holes are pre-punched into the metal on 8" centers to accept two splash mount faucets (sold separately). For your convenience, a 3 1/2" drain basket is included on each sink bowl for easy cleaning.
