Notes & Details

This Regency stainless steel mop sink cabinet is a great way to keep all your mopping supplies organized and ready to use when you need them. This unit includes a mop sink on the left side with a 20" x 16" x 12" bowl along with a 30" garden hose attachment to provide a dedicated station for washing mops, filling containers, emptying mop buckets, and other janitorial needs. Since the sink is made from 16 gauge type 304 stainless steel, it provides excellent durability and corrosion resistance where it's needed most.

The cabinet features a fully welded design to ensure long-lasting use, while the open back and ventilation slits built into the sides promote proper airflow. The interior of the cabinet also helps to keep you organized with a mop holder for each side and 4 stainless steel storage shelves for keeping all of your gloves, cleaning products, and other commonly used supplies close at hand. The doors feature a recessed handle, and two lock and key sets are included to keep the cabinet's contents secure when not being used. The sides, 15-degree angled top, and storage shelves are all made from 18 gauge type 304 stainless steel, while the bottom and doors use type 430 stainless steel (22 gauge on the doors, 18 gauge on the bottom).
