Notes & Details

This Regency 6" x 6" bar drink rail is the perfect addition to your bar service area! It is ideal for placing under beer taps and makes for a great spot to temporarily sit a drink after it is poured so that any overflow is caught and collected. This rail is designed to be surface mounted on the countertop, beneath beer or other beverage taps.

This drip tray also features a built in sprayer, which can be used to quickly blast the inside of the glass with a stream of water, rinsing it out and also making the inside wet for a cleaner pour. Made of 18 gauge type 304 stainless steel, it provides excellent durability and cleanability, while also resisting corrosion. The top grate features draining slots and is removable for easy cleaning and maintenance. A brass 3 1/2" x 5/8"-18 threaded drain allows any liquids to flow out of the rail, preventing overflows onto the floor or counter. The sprayer features a 1/2" inlet for connection to a water line.
