Notes & Details

Keep your ice insulated and easily accessible with the Regency 18" x 24" stainless steel drop-in ice bin. With a 10" deep cavity, this chest can accommodate drink-serving operations of nearly any size. The whole unit has dense foamed-in-place insulation, ensuring your ice stays cool for extended periods of time.

20 gauge type 304 stainless steel construction adds extended durability, while a 1" centered stainless steel drain siphons away melted ice. A stainless steel sliding cover is included to ensure proper insulation and protect the ice from contamination.
