Notes & Details

Keep your staff safe by eliminating heavy lifting of mop buckets with this floor mounted mop sink with left and right side splash guards from Regency Tables and Sinks. The bowl is made of high-quality 16-gauge type 304 stainless steel for reliable service. This gauge is thicker and much more durable than many similar sinks available that are made of 18-gauge stainless steel. Additionally, type 304 stainless steel is exceptionally corrosion-resistant and easy to clean! It also has TIG welded areas, which are blended to match adjacent surfaces to a satin-smooth finish.

This mop sink includes a stainless steel subway-style grating for easy cleaning, while its close spacing helps prevent casters from getting trapped. The 22" x 21 3/8" x 10" compartment offers rounded corners and ample space to conveniently wash your mop. In addition, the drain includes a 3 1/2" basket strainer to eliminate the possibility of clogging. By regularly maintaining your drainage system, you will cut down on possible service and replacements costs.

Thanks to the standard 16 1/2" high backsplash and left and right side splash guards, water splashes will be confined inside the sink and then directly drip down into the drain. This added feature helps maintain the integrity of your floor to keep your establishment in its best condition. Perfect for use in any restaurant kitchen or dish room, this floor mounted mop sink gives you a convenient and sanitary way of disposing dirty water and other liquids.
