## Plan View

## Notes & Details

Effectively store liquor bottles within convenient reach of the bartender while adding a reliable storage solution that creates a unique display for customers with this Regency 24" wide liquor display cabinet! At 23" deep, this cabinet accommodates approximately 30 liquor bottles and, thanks to the stepped five-tiered design, all bottles are clearly on display at all times within a compact 24" wide footprint. A 3" backsplash combines with full-height side enclosures to help protect the walls, floor, and other equipment around the unit from accidental splashes and spills, while a 2" wide integrated bar on each tier helps hold bottles in place for added assurance.

Built for reliable, long-lasting performance, this Regency 24" liquor display cabinet features an 18 gauge type 304 stainless steel bottom, back, sides, hat channel, and steps. That not only makes for a durable addition to your bar setup, but also one that is extremely simple to clean! The stainless steel legs rest soundly on stainless steel feet.
