THE MISSING LINK FOR THE SINK

ScrapDrain™

SINK SOLIDS SEPARATOR

ScrapDrain is the sustainable sink guard for the modern kitchen. It separates waste scrap **BEFORE** it goes down the drain with greater capacity and finer capture.

THE DEEP INTERNAL BASKET SEAMLESSLY STRAINS SOLIDS FOR EASY & TIDY TRANSFER.

Wash & rinse dishes as normal while ScrapDrain strains away the liquid, separates out solids, and presents a one-step tidy transfer for composting, municipal pickup or drop-off recycling program.

ScrapDrain - the sustainable choice for the modern kitchen

ENVIRONMENTAL & FUNCTIONAL BENEFITS WITH ScrapDrain:

- **IMPROVES** wastewater quality by reducing total suspended solids and FOG¹
- **PREVENTS** clogs in kitchen drains, sewer lines, septic systems & grease traps
- **SIMPLIFIES** sink scrap collection & streamlines transfer to a compost option
- **DIVERTING** food waste from LANDFILL helps to reduce greenhouse gases
- **REPLACES** electric disposals with better solids prevention & less water use
