Notes & Details

Proudly made in America and packed with features to meet the needs of heavy-duty, high-volume foodservice operations, this stackable and powerful Solwave Ameri-Series Space Saver commercial microwave oven is an essential countertop addition. 11 integrated power levels and a 2,100W power output provide consistent, delicious results for frozen, refrigerated, and fresh foods, taking dishes from the freezer to the table in just minutes. This model is easy to use and features up to 100 multi-stage, programmable menu items that simplify the cooking process. The integrated touch pad controls are user friendly and require minimal training. The 2 13/16" color LCD display, easy-to-use interface, one-touch programming, and USB allow you to not only quickly program your single unit, but also upload your new menu to every unit in minutes.

Both the exterior and interior boast a stainless steel design for easy cleaning and a polished, professional look while also providing a rugged construction that makes the unit stackable so that you can save valuable countertop space. An ample 0.6 cu. ft. interior capacity accommodates 6" deep, 1/2 size food pans, and a removable ceramic shelf is sealed and recessed to reduce plate-to-shelf edge impact and keep spills contained. See-through tempered glass and lighted interior allow for monitoring the items inside without opening the door. For added convenience, a four stage cooking option with one-touch programming will reduce prep time, labor, and food waste.

Engineered to offer maximum durability and years of use, this microwave also includes a removable and cleanable air filter that protects the interior components from grease-laden air and even a clean filter reminder that tells users when it is time to be cleaned. Plus, its maximum cook time of 60 minutes beats competitors' units, making it perfect for use in food courts, prep stations, and casual dining! A 208/240V electrical connection is required for operation.
