

Good value – direct heat

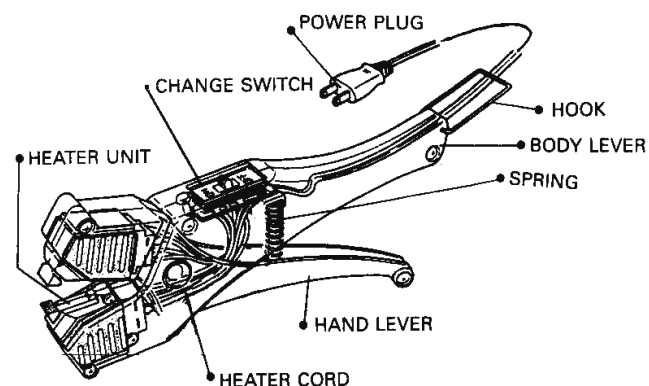

- Lightweight
- Easy to operate
- Two temperature settings: high and low
- Suited to any thickness
- Direct heat weld – solid & firm

## More Details:

Our direct heat clam Shell Sealer (KF-772DH) is equipped with two heated 3/8" wide and 10mm long serrated jaws. Two temperature settings are available: 410°F and 356°F (210°C and 180°C).

Our KF-772DH clam shell sealer can be used to weld OPS, PSP, PVC, and EPS food packaging cases. The clam shell sealer is ideal for sealing poly packing cases such as clam shells and other similar types of containers. Handles remain cool during operation.

The sealer can be used in voltages ranging from **100-240V.**

## Features:

	KF-772DH
Type	direct heat / constant heat
Power Supply	AC100V-240V 50/60Hz
Watts	20W
Temperature Settings	High : 410°F / 210°C Low: 356°F / 180°C
Effective Welding Area	4mm x 10mm
Dimensions	1" x 8.2" x 2.5"
Weight	10oz.
