

Stock Pots

Combining durability and efficiency

A staple in your commercial kitchen, these stock pots are superior in performance, yet affordable. From preparing large stocks and soups to boiling large pasta dishes and shellfish, these stock pots help chefs with nearly every culinary creation.

Special Features

Durable Stainless Steel Construction

Constructed of durable, scratch-resistant stainless steel, these stock pots make the perfect workhorses for any commercial kitchen, withstanding the rigors of everyday use.

Superior Heat Distribution

Features a 4mm thick aluminum clad bottom, increasing heat distribution to deliver consistent mouthwatering creations and eliminate hot spots.

Flavor Neutrality

Smooth nonreactive stainless steel interior promotes flavor neutrality by not interfering with the chemical composition of your signature dishes.

Handle Design

Two loop handles allow for quick and easy transport around your busy kitchen.

Induction Ready

Can be used on standard gas or electric cooktops as well as induction surfaces for foodservice establishments transitioning to induction to increase operational efficiencies to save on cost.

Covers Included

Accompanying cover helps to retain moisture and heat for efficient cooking, while minimizing splatter to eliminate unnecessary messes.
