

TM-220 FLEX GLIDE READY

TM-220 FLEX GLIDE READY is a NSF certified food grade tortilla releasing emulsion ready to use on grills, ovens, loaf pans, boning benches, chopping boards, or other hard surfaces to prevent food from sticking during processing.

TM-220 FLEX GLIDE READY meets FDA 21 CFR specification for incidental food contact. It is non-flammable & non-toxic Silicone Emulsion that is safe to use in an open environment.

AVAILABILITY: 1 quart (0.940kg)

TM220 FLEX GLIDE READY is intended to prevent Tortillas, Wraps, Flat-Bread & Chapatti from sticking to the Tortilla Griddle without affecting the color, flavor or smell during or after its use. It is applied via a hand sprayer. After the water evaporates, a thin film of clear silicone is imparted on the surface.

FEATURES:

- Active ingredient: Active PDMS Silicone oil (CAS# 63148-62-9)
- Apply via hand sprayer: after water evaporates, a thin film of silicone is imparted on the surface
- Meets FDA 21 CFR specifications for incidental contact with food in food processing
- NSF certified
- Excellent Food Grade Release Agent
- Non-Flammable: can be used on hot surfaces
- Contains no solvents or petroleum distillates
- NPF Nonyl Phenol Free: can ship to the EU and Canada without restrictions

APPLICATIONS INCLUDE:

- Is acceptable to prevent Tortillas, Wraps, Flat-Bread & Chapatti from sticking to the Tortilla Griddle
- Food Processing: Meets requirements for incidental contact with food in food processing and food packaging areas
- Is acceptable for use as a Release Agent (3H) on grills, ovens, loaf pans, boning benches, chopping boards
- Is acceptable on hard surfaces in contact with meat and poultry food products to prevent food from adhering during processing
