

VacPak-It VMC32 Chamber Vacuum Packaging Machine with Two 16" Seal Bars and Oil Pump

Item #186VMC32

Technical Data

Width	19 1/2 Inches
Depth	22 1/3 Inches
Height	18 9/16 Inches
Seal Length	16 Inches
Chamber Width	16 3/4 Inches
Seal Wire Width	3 1/2 Millimeters
Chamber Depth	18 Inches
Chamber Height	7 Inches
Amps	9 Amps
Hertz	60 Hz

Features

- Powerful 1 1/2 hp oil pump runs quickly and quietly; perfect for heavy-duty use
- Two 16" easily removable seal bars for better suction; each has double seal wires for extra security
- Quickly seals bags in less than 6 seconds and vacuums in 20 to 40 seconds
- 304 series stainless steel body for exceptional strength and durability
- Includes pressure gauge, 3 filler plates, and a maintenance kit

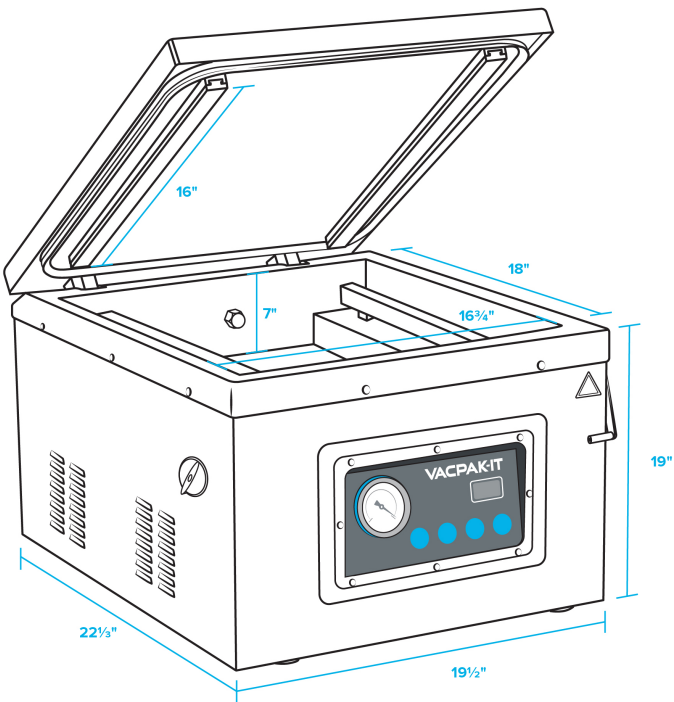

Certifications

Technical Data

Phase	1 Phase
Voltage	120 Volts
Wattage	1180 Watts
Control Type	Digital
Horsepower	1 1/2 hp
Installation Type	Countertop
Number of Seal Bars	2 Bars
Number of Seal Wires	2 Wires
Plug Type	NEMA 5-15P
Power Type	Electric
Pump	Oil
Style	Chamber
Vacuum Packaging Machine Type	Automatic

Notes & Details

Seal ingredients for storage or pre-cooked portions of food for later use with this VacPak-It VMC32 chamber vacuum packaging machine with two 16" seal bars. This powerful chamber vacuum packaging machine quickly seals each bag in 6 seconds or less and completely vacuums out the air in 20 to 40 seconds. This not only ensures efficiency, but a reliable, secure seal after every use. Plus, with two seal bars, it operates with more suction power and delivers an even tighter seal than most units for incredible results, especially with large bags of product!

Controls are designed for ultra-simple use, with arrow buttons to increase or decrease the duration of the seal or vacuum process. The digital controls also have a bright, easy-to-read display to show the vacuum pressure. This makes the unit's performance and progress easy to monitor, as does the built-in pressure gauge. Since the lid is transparent, you can even watch the vacuum packaging process first-hand.

To deliver a long-lasting product, the unit is equipped with an oil pump that's both easy to check and easy to refill as needed. It's tested for up to 200,000 cycles too, so you can be sure that the machine is a great investment for your business. The 304 series stainless steel body is an additional perk, as it won't corrode or rust from the accidental spill or leak. This particular model requires a 120V electrical connection for operation.
